NILE AI ACADEMY / A NILE AI SOLUTIONS INITIATIVE

2027 School Partnership Proposal

Practical Artificial Intelligence education for secondary schools, with adapted primary-school and teacher programmes.

An invitation to partner

Nile AI Academy, an education initiative of Nile AI Solutions, invites schools to explore hands-on AI learning. We bring practical demonstrations, guided activities and structured projects led by people with real-world AI and digital technology experience.

Our learning philosophy

Discover !’ Try !’ Create !’ Showcase. Each learner should do more than watch: they should experiment, question AI outputs, build something useful and explain what they learned.

Outcomes for students

- Understand what AI is, where it is used and its limitations.
- Use AI to support learning while preserving academic honesty.
- Check facts, protect personal information and use digital tools responsibly.
- Create and present an age-appropriate practical project.

Training packages and starting fees

AI Discovery Day — UGX 650,000

2–3 hours. A hands-on introduction with live demonstrations, responsible-use activities and a student challenge.

AI Skills Term Programme — UGX 2,700,000

6 sessions. A structured journey through AI foundations, prompting, study support, creativity and a student showcase.

AI Innovation Club — UGX 4,200,000

10 weekly sessions. Small-group guided challenges, prototyping, collaboration, feedback and an innovation showcase.

Teacher AI Workshop — UGX 600,000

2–3 hours. Practical support for lesson preparation, practice activities, privacy, verification and professional judgment.

NILE AI ACADEMY / A NILE AI SOLUTIONS INITIATIVE

Partnership & delivery

How we work together to create a safe, valuable school learning experience.

A sample six-session student pathway

- 01 Understanding AI and its everyday uses
- 02 Using AI to support study and learning
- 03 Prompting, reasoning and verifying answers
- 04 Creative digital content and presentations
- 05 Responsible AI, privacy and future skills
- 06 Team innovation challenge and showcase

How school visits work

- Enquire: submit basic school information and preferred programme.
- Plan: agree dates, participants, internet/device availability and timetable.
- Deliver: facilitator-led sessions with school staff supervising.
- Reflect: student activities, feedback and a brief programme summary.

School responsibilities

The school provides an appropriate venue, a designated staff coordinator, student supervision, an agreed timetable and access to available electricity, internet and devices where relevant. The delivery plan is adjusted if resources are limited.

Safeguarding and privacy

We avoid requesting student personal data for initial bookings. School-led consent procedures, learner safety rules, provider age requirements and staff supervision apply to all delivery. Photographs or pupil work are not published without appropriate permission.

Pricing and quotation notes

Rates shown are indicative introductory prices, not a binding offer. Travel, extra cohorts, additional facilitators and equipment requirements may alter the quotation. The school receives a written scope and agreed fee before delivery.

Next step

Visit schools.nileai.solutions/book to request a school visit or discuss a partnership. Nile AI Academy is an initiative of Nile AI Solutions.
