NILE AI ACADEMY / A NILE AI SOLUTIONS INITIATIVE

Learn AI by Doing.

2027 school programmes • Practical skills, real projects, responsible AI.

We introduce Ugandan students to the possibilities of artificial intelligence through live demonstrations, guided challenges and useful projects. Our aim is to build confident thinkers and creators—not simply users of software.

Why schools choose this approach

- Practitioner-led: real-world technology experience, not theory alone.
- Hands-on first: discover, try, create and showcase.
- Designed for Uganda: flexible formats and equipment needs.
- Responsible by design: age-appropriate activities, privacy and verification.

Programmes & introductory fees

AI Discovery Day | UGX 650,000

2–3 hours — A hands-on introduction with live demonstrations, responsible-use activities and a student challenge.

AI Skills Term Programme | UGX 2,700,000

6 sessions — A structured journey through AI foundations, prompting, study support, creativity and a student showcase.

AI Innovation Club | UGX 4,200,000

10 weekly sessions — Small-group guided challenges, prototyping, collaboration, feedback and an innovation showcase.

Teacher AI Workshop | UGX 600,000

2–3 hours — Practical support for lesson preparation, practice activities, privacy, verification and professional judgment.

Getting started

Tell us about your school, student ages, facilities and preferred dates. We will recommend a format and prepare a tailored quotation. These prices are starting estimates and may vary with group size, travel and equipment.
